INFORMATION DISCLOSURE STATEMENT TRANSMITTAL

Sir:

In accordance with Applicant's continued duty of disclosure, the documents on the attached Form PTO-1449 are brought to the Examiner's attention. Copies of the non-US patent documents are enclosed. The relevance of the non-English documents is as follows.

JP 2001-071192 relates to a safety system that detects access into a hazardous area by the use of two perpendicular light curtains. Each light curtain comprises a plane of parallel light beams emitted across the opening to the hazardous area. The use of the perpendicular light curtains allows the horizontal and vertical extends of the obstructions passing through the curtain to be detected and saved. While this arrangement allows the detection of both the width and the height of obstructions passing through the light curtain, it does not allow the detection of shape, nor does it allow the calculation of the distance from the obstructions to the moving part. Further, it is also not detecting obstructions in the path of the moving tool, but is providing a safety curtain preventing access to the hazardous area.

The device described in EP1246148 uses a camera on one side

of a protected area and an illuminated reflector on the other side such that the camera receives light from the reflector that has passed through the reflected area. A means is provided to store the image received by the camera when no obstructions are present. The image is not examined to determine where the obstructions within the protected area lie but the image is compared as a whole to the image currently being received by the camera and movement of machinery through the protected area is stopped if the images differ by more than a predefined amount."

The undersigned submits the above-identified references for independent consideration by the Examiner and does not make any admission that these references are or are not material to the present invention or that these references are or are not prior art with respect to the present invention.

No fee is believed to be due as a result of this response. Should the Commissioner determine that a fee is due, he is hereby authorized to charge said fee to the Deposit Account of record.

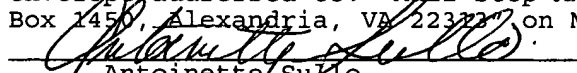

Respectfully submitted,

Kevin S. Davies
